

SIEMENS

Style

Unmistakeable and elegant

The Style series is the modern archetype of the traditional series, both in terms of aesthetics and functions, which go beyond fashion trends. With regards to its appearance, the Style series has remained unchanged in many aspects, which still make its functional version one of the most recognised and recognisable.

New collection of Siemens one-way switches and mechanisms: design, elegance and technology for homes, offices and hotels.

In some cases, we need a touch of style and elegance that goes beyond clichés. The singular aesthetics of the elements of the Style series can be combined into elegant solutions that can be fully integrated into the spaces of modern buildings. A very popular concept in the residential and tertiary sectors.

Its structure has an ergonomic design to guarantee easy, quick and comfortable installation. It features a compact mechanism to use all space inside the mounting box and facilitates cable routing. It is designed to ensure proper installation.

- One-way and two-way MEC18 switches rated at 16A are used, allowing many different applications with the same mechanism and reducing the number of items and references that must be stocked.
- Galvanised steel fixing frames with anti-corrosion treatment to ensure durable installation components.
- Fixing frames with upper and lower profiles to facilitate assembly and a rigid position of the mechanism.

The socket outlets feature increased touch protection elements and use standard STAI connectors (open safety screw system), which only require connection and tightening. The screws close with a single operation and have an engraved floating nut which prevents the cable from slipping and guarantees perfect fixture across the whole of the contact surface. The three conductors enter through the top of the socket outlet. They are also screwed on one side of the socket outlet. The outlets, which are supplied separately from the covers, allow terminal connection and fast and safe fixture.

Certifications

MEC 18

The same mechanism for 5 different designs

Protection IP44

Our usual series are now also available for outdoor use.

- In all colours and frames.
- Schuko®, switch, TV and RJ socket.
- Common frame to IP20.

Many different functions

The Style series offers a wide range of functions to cater to today's needs. Light intensity dimmers, sound controllers and blind rolling up and down mechanisms. Choose the options you need, guaranteeing total comfort and enjoy our solutions' colourful and appealing designs.

Dimmers

Dimmers are the perfect element create an atmosphere in rooms by adjusting the lighting levels to the desired intensity. The intensity can be increased or decreased. The power and technology of the different lamps requires using specific dimmers, adapted in each case to adjust the power levels. BJC offers a wide range of dimmers, suitable for different lamps and power ratings.

Chargers with double USB

The Schuko® socket with double USB Type A and Type C allows the simultaneous charging of two terminals while maintaining the usability of the socket. Quick and easy installation in a standard flush-mounted box.

- Power Delivery (required by EU by the end of 2024)
- Quick charge
- For standard flush-mounted box.

Multimedia

The multimedia connectors are the perfect solution to prevent exposed wiring in the installation and for the distribution of electronic devices in any type of installation; whether household or commercial. The HDMI, VGA, RJ45, stereo cable and other outputs can provide separate input and output sources, for efficient connections and uncluttered installations.

LED indicator

Siemens' modular LED indicators are used to indicate: stairs, waiting rooms, interiors, corridors and calls. They are available in three tones of white, green and red. The modular system allows the combination of two beacon lights or two elements, such as a buzzer and LED beacon light, indicating that there is a call; sound and visual.

Smart solutions with KNX

KNX connects a network of functions, including security, climate-control, lighting and multimedia devices. The system's centralised and smart control systems can cater to the needs of each specific case and can be programmed at any time. With a discreet design, Siemens' keyboards allow the installation to be easily and comfortably handled.

Style surface mounting box

The surface mounting box of the Style series can be used in non flush-mounted installations and be fully integrated into the aesthetic characteristics of the series. The cable glands for connections can be used for wiring and terminal strips. They are offered in polar white and platinum metallic finishes and for frames with one, two or three elements.

16 A in Mec switches

The switches feature a powerful 16 A device with automatic terminal connection, with an ergonomic design for comfortable, easy and safe handling.

Mechanism

Mec 18 mechanism, which can be adapted to Iris, Iris plus, Mega and Siemens products for your comfort.

Frame

Compact space between the frame and switch. High-quality finishes.

Switch

Accurate operation. Smooth and comfortable to the touch.

2385

Dimmer for LED lamps

Power supply voltage: 230V~ 50/60Hz.

Consumption: 2VA.

Valid for adjustable LED lamps:

- to 230V~: 4-100W
- To 12V~ with adjustable electronic transformer (1 lamp/ transformer): maximum 6 transformers (50W).

2386

Packing 1

Dimmer for LED strip, monochrome (12-48 Vdc)

Power supply voltage: 12 - 48V CC.

Consumption: <12mA.

Maximum Load 8A.

Minimum regulation level: 1% - 60%.

Regulation speed 0% to 100%: 3 - 10 s.

2387

Dimmer for adjustable compact fluorescent lamps

Power supply voltage: 230V~ 50Hz.

Consumption: 3VA.

Load: min.20 - Max.200W.

2388

Packing 1

Coupler for optical fibre
connector Type SC/APC 3191

To be used with adapter 3190 or directly
plugged in the RJ cover.
To be installed in increased depth flush-
mounting box in order to respect the minimum
bending radius of the fibre optic according to
norm

Packing 20

Keystone adapter 3190
to be used with the coupler 3191
in RJ adapters

For a proper use of this adapter an
increased depth flush-mounting box is
recommended.

Packing 20

Voice and data connectors and adapters

Support plates for two computer connectors according to table.

Whitout claws

Heated floor, electronic thermostat

Electronic temperature control for heating systems, for example: electric heated floor systems, bathrooms, ceilings, marbles and heated walls.
Voltage: 230 V ~, 50 Hz
Sensor: external or internal & external (monitor).
Floor sensor included in the package.
Cutting capacity: 16(2) A
Range: 10 to 50 °C (scale of 1 to 5)
Indications (LEDs): heating up (Network), and eco mode activated (green).
Extension of the sensor: up to 50 m only with 0.5 mm2 cable, double insulated.
Note: Ensure that the sensor cabling is contained in protective insulation. It is not possible to wire the sensor in parallel with AC power lines.
